

MIST REFILL

After using your Cauldron a few times, the mist effect will be reduced. You can create more mist by refilling with liquid found in the Refill Vial.

1. Ensure all water/liquids have been drained from the Cauldron and it is in the reset position (refer to "Emptying Your Cauldron" and "Resetting Your Cauldron" sections of this manual).
2. Unscrew bottom half of the Cauldron and set aside. Place the top half of the Cauldron upside-down.
3. Undo the lid on the Refill Vial and locate the cross-shaped hole in the Cauldron.
4. Place the end of the Refill Vial in the hole until it stops and firmly squeeze 3 times. Do not overfill. Wipe up spills with damp cloth.
5. Remove the Refill Vial and seal it with the lid.
6. Reassemble the Cauldron.
